Synopsis Report: Newton School Lite Website Development.

Introduction: The purpose of this project is to develop a lite version of Newton Schools website using HTML, CSS, and JavaScript. The website is designed to provide interactive and engaging learning experiences for users. The website will be user-friendly and accessible to users of all skill levels.

Project Goals:

1. Develop a user-friendly and responsive website using HTML, CSS, and JavaScript.
2. Provide engaging and interactive learning experiences for users.
3. Ensure that the website is accessible to users of all skill levels.
4. Implement a clean and modern design that is aesthetically pleasing.
5. Provide high-quality content that is informative and easy to understand.

Technical Requirements:

6. HTML for the structure of the website
7. CSS for the presentation and layout of the website
8. JavaScript for the interactive features of the website
9. Responsive design to ensure that the website is accessible on all devices
10. Use of modern web development techniques and best practices

Website Features:

11. User-friendly navigation
12. Interactive learning modules
13. Quizzes and assessments
14. Discussion forums
15. Multimedia content (e.g. videos, images, audio)

Conclusion: In conclusion, the development of Newton School Lite website using HTML, CSS, and JavaScript is an exciting and challenging project. The website will provide users with engaging and interactive learning experiences and will be accessible to users of all skill levels. The website will implement modern web development techniques and best practices to ensure a clean and modern design.
